PROJECT DESCRIPTION

Expansion of the existing library facility via new additions of approximately 11,300 square feet and reorganization of the existing library spaces. The space reorganization required demolition of an existing stack wing and structural retrofits to accommodate attachment of the new additions.

The original historic library was repaired and restored throughout. The Civil War memorial was relocated to a more prominent location within the new library space.

Composite steel framing provided the necessary flexibility in mating the new and old structure and integrating the new mechanical systems.
